

**MANUFACTURE OF LIQUID CRYSTAL DISPLAY PANEL**

Patent Number: JP11326922  
Publication date: 1999-11-26  
Inventor(s): OGINO YUJI  
Applicant(s): MATSUSHITA ELECTRIC IND CO LTD  
Requested Patent: ☐ JP11328922  
Application Number: JP19980130893 19980514  
Priority Number(s):  
IPC Classification: G02F1/1339 ; G02F1/13  
EC Classification:  
Equivalents:

**Abstract**

**PROBLEM TO BE SOLVED:** To actualize a superior panel display at the periphery of a display part by suppressing variation of a cell gap nearby the seal material of the liquid crystal display panel.  
**SOLUTION:** Glass substrates 1 and 2 have transparent electrodes, the glass substrate 2 is provided with a 1st seal material 6 surrounding a display cell area and a 2nd seal material 9 surrounding the 1st seal material 6 annularly, and liquid crystal 8 is dripped in the display cell area; and the glass substrates 1 and 2 are stuck together under reduced pressure and then put back to the atmospheric pressure to cure both the seal materials 6 and 9. Consequently, a pressure reduced state is produced between the 1st seal material 6 and 2nd seal material 9 and the glass substrates 1 and 2 are brought into contact more nearby the 1st seal material 6 under the atmospheric pressure to form a stable seal gap of the 1st seal material 6.
